

## CS 1 – FUNDAMENTALS OF COMPUTER SOFTWARE AND APPLICATION

### Laboratory Exercise #10 Function Room Income

NAME:  DATE:   
CODE/SCHEDULE:  TERMINAL #:

**TOPIC(S) COVERED:** Creating Chart

**ESTIMATED COMPLETION TIME:** 1 hour and 25 minutes (1 meeting)

**OBJECTIVES:**

1. To be able to create chart of the given data base from specified output.
2. To be able to familiarized the different elements of a chart.
3. To be able to understand the importance of presenting data using chart.

**DISCUSSIONS:**

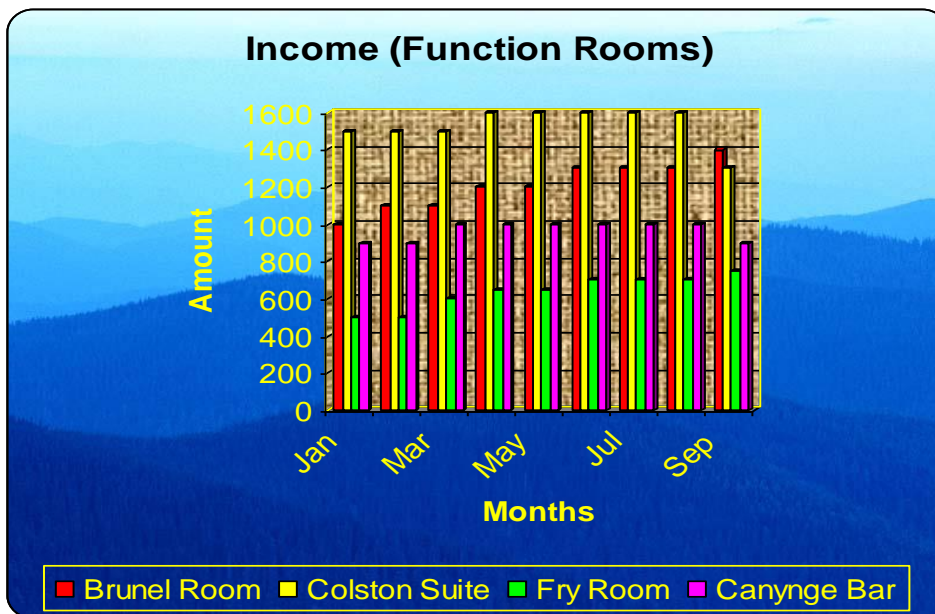

Spreadsheet is application software that presents data in a row and column or table. Another power that this application software has is to create those tabulated data in a chart. Chart is the graphical representation of the data. It is easier to understand.

**PROBLEM:**

Secure a copy of Formulas workbook from your instructor.

Create a chart from the data of rooms worksheet. Format the chart similar to the picture presented below.

Save the activity in your Z:/.
